

My Essay

Everyone has a different opinion about who their hero is or who their favorite teacher is and why they are their favorite. Also who inspires them the most? All those things fall into one name for me Mrs .Hornsby or also known as Mrs.Fryer . She was my 4th grade teacher at ward central elementary. She helped me every time I needed help and she also helped anyone else that needed help . The reason she inspires me is because she was an amazing teacher to me. She gave me the benefit of doubt when others had already judged me and labeled me. She gave me a fresh start and believed in me and made me believe in myself. When I felt I couldn't do my work she made sure I understood it and was not confused. That showed me that you can spare time and take your job to heart and help others. when I grow up I want to be just like her and give kids that feeling that I am always there for them and will always help them. I want to be a teacher and teach children that the possibilities are endless and that you can set high goals and work for them with incredible teachers. After having Mrs. Fryer as a teacher she touched my life and I want to touch others. Have you ever heard of Class Dojo? Well she used it and the person with the most points at the end of the day could sit at her desk for a day or they could eat lunch with her. She used a lot of awards to get us to behave and she was nice to us and never really yelled at us or made us feel dumb. She defiantly didn't show anger toward kids in a mean way she always seemed to keep a smile on her face when there were times that she shouldn't have. That is the kind of person who is a hero and can inspire anyone around her that wants to be a teacher or a good hearted person.
